Full stack software developer with 4+ years of experience in designing and developing user interfaces, testing, debugging and deploying web and mobile apps using .Net Core, PHP, react, react native, electron and node Js.

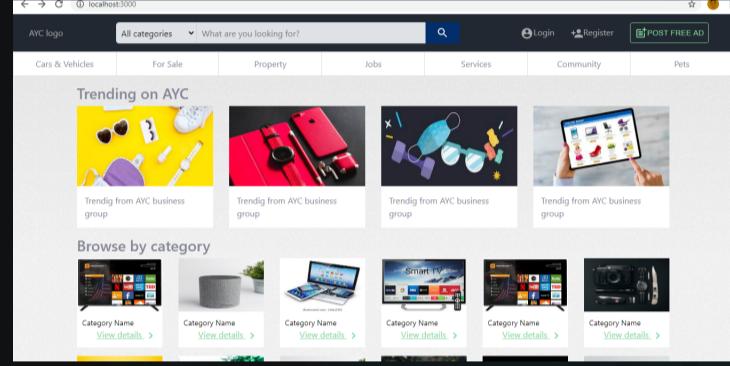

GitHub Profile: <https://github.com/wanziro>

My Projects

E-commerce website template

Through the power of react, I have created this project in order to help various entrepreneurs who needs to start an e-commerce business to use this template as a reference. It is very fast and mobile responsive.

Non Stop Dj

This is a desktop application, which will automatically create a non stop music mix and live mix very effeciently. To use this software, users must install the setup into their pc and start enjoying the mix!.
